MPG figures are EU test figures for comparative purposes and may not reflect real driving results. There is a new WLTP test used for fuel consumption and CO₂ figures. However, the CO₂ emissions shown are based on the outgoing NEDC test and will be used to calculate vehicle tax on first registration. Only compare fuel consumption and CO₂ figures with other cars tested to the same technical standard. The fuel consumption you achieve in real life conditions and CO₂ produced will depend upon a number of factors including accessories fitted (post-registration), variations in weather, driving styles and vehicle load etc.

*¹ Driver's side front window has auto up/down function with pinch protection. *² Displays: Fuel Economy Screen, Eco-Evaluation Screen, Active Safety, Clock / Outside Temperature and Self Check etc. *³ Two available SI-Drive modes: Intelligent mode & Sport mode. *⁴ The Stop & Start system will automatically stop and restart the engine when the car comes to a standstill to reduce fuel consumption and emission. *⁵ SRS: Supplemental Restraint System. Must be used in conjunction with seatbelts.
